

# ReZOOM™ SOFTWARE

## All-In-One Protection To Eliminate PC Downtime

### Product Benefits

- All-in-one solution: backup, instant recovery and repair
- Works automatically in the background to protect your data and productivity
- Instantly restarts PC from a bootable backup drive
- Built-in repair wizard fixes common Windows problems
- Backup to any bootable SCSI or IDE drive

Without your PC, where would you be? That's why you need ReZOOM. It's more than just a better way to back up data. ReZOOM instantly overcomes system crashes, and it repairs software and virus problems. ReZOOM assures you uninterrupted access to vital business files, email and Internet resources. It's all-in-one PC protection to keep you working productively.

### Hassle-Free, Intelligent Data Protection

ReZOOM runs automatically, in the background, backing up files while you work, during idle time or on a schedule you specify. It's so fast and easy, you'll never notice it backing up your data. And ReZOOM won't backup more troubles for you. It automatically checks for software problems and viruses—and corrects them—before saving data to your backup drive.

### One-Keystroke Recovery

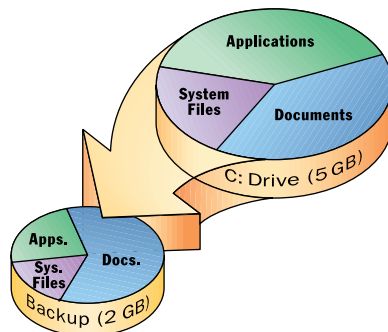

Using a second hard disk drive, ReZOOM transparently maintains a copy of your critical system, application and data files. If Windows® won't start, ReZOOM can instantly boot your computer from the backup disk with just one keystroke. It's a "spare engine" for your PC that gets you back up and running at full speed with your vital data and applications intact.

### Flexible Configuration

You can use any spare IDE or SCSI drive as a backup disk. Even smaller drives can work with ReZOOM, allowing you to selectively back up your most critical data. An on-screen icon guides you through fitting files to the space available on your backup disk. You select what files to protect—ReZOOM does the rest.

### Effortless System Repair

No more reinstalling Windows or waiting for technical support. ReZOOM can fix your primary drive or restore your system in the event of a software problem. ReZOOM's repair wizard automatically checks for boot blocks, checks file allocation tables, identifies missing or damaged system files, and more. Instant recovery is always just a keystroke away, with ReZOOM.

*Even smaller drives can work as a backup disk.*
